Abstract:

Direct payments play an important role in the financing of agricultural holdings in Romania. They represent the main form of support within the Common Agricultural Policy, financed by the European Agricultural Guarantee Fund. The purpose of this paper is to investigate the impact of direct payments on the economic situation of Romanian agriculture. Using linear regression functions, it was determined that direct payments affect positively and with a medium to strong intensity the value of agricultural production.

1. Basic Income Support for Sustainability - BISS

Estimated amount for Romania (euro/ha)

2023	96,47
2024	97,85
2025	99,27
2026	100,66
2027	103,06

2. Complementary Redistributive Income Support for Sustainability – CRISS

- It is intended for farmers between 1-50 hectares. These farms represent the majority of farms in Romania.
- The estimated amount is around 50 euros per ha.

3. Complementary Income Support for Young Farmers CIS-YF

- Complementary income support for young farmers up to 40 years of age with agricultural skills.
- The estimated amount is around 50 euros per ha.

4. Coupled support

- ❖ Vegetable: 12 areas of interventions
- ❖ Livestock: 5 areas of interventions
